INTERESTS

History, cultures, languages, government, travel, geography, law

EXPERIENCE

MYWIKIS | FOUNDER, CEO, CTO

February 2012 – present | McKinney, TX

- Founded wiki hosting company at age 11, company began making profit in 2013
- Rescued company from insolvency by pivoting strategy
- Established hosting platform and its customer onboarding system with automated features that speed up wiki creation process, decreasing time spent on onboarding year by year
- Tripled revenue by adding new features and offering imports from competitors

CODE HORIZON | Co-FOUNDER AND INSTRUCTOR

May 2018 – July 2018 | McKinney, TX

- Founded summer camp with two friends after two years of experience teaching in other camps
- Planned and taught class curriculum to students age 7-14, included as much as possible to stimulate students while ensuring it was easy to understand

LOANWAT.CH | FULL STACK WEB DEVELOPMENT INTERN

June 2018 – August 2018 | Dallas, TX

- Created `loanwat.ch` website using Bootstrap
- Redesigned `loanwat.ch` logo and created business cards using Adobe Illustrator
- Created client API with AWS Lambda in Node.js using Claudia.js
- Migrated public records data scraping code from Jupyter notebooks to Python application

PROJECTS

UNT/UTD GRADE DISTRIBUTIONS | PROJECT LEAD

June 2018 – Present | McKinney, TX

- Worked with Garrett Gu and Joseph Wickline to create grade distributions websites for the University of North Texas and the University of Texas at Dallas
- Implemented in client-side JavaScript and NeDB, runs on GitHub Pages
- Learned to request public information from government entities (i.e. public universities), import data, and convert data to different formats
- Used by thousands of students to pick good classes for upcoming semesters
- Featured on UT Dallas student newspaper, UTD Mercury
- Websites: <https://untgrades.com> and <https://utdgrades.com>

UNT SOFTWARE ENGINEERING LAB | UNDERGRAD RESEARCHER

June 2017 – August 2017 | Denton, TX

- Researched under direction of Dr. Stephanie Ludi, Professor of Computer Science at UNT
- Investigated efficient auditory cues for blind or visually-impaired persons to utilize visual, block-based programming language development environment
- Developed a functional prototype of Pencil Code development environment using jQuery to handle events and Howler.js to handle audio

AWARDS
